

Taylor's Standard Catalogue

Second Edition—(1904)—More Pages, Enlarged Scope

Standard and invaluable guide for collectors and exchangers of North American Eggs and BIRD SKINS. (Conforming to the nomenclature of the American Ornithologists' Union.) Will be issued before collecting season is past, with the active co-operation of American Birds Students.

PRICE, 25 Cents, Prepaid

The first edition, issued, New York, '96, pricing eggs only, still enjoys wide circulation as the STANDARD handy compendium, the ONLY amateur and unbiased Catalogue. The second edition will have a chapter of value to Oologists from the pen of Fred M. Dille of Colorado, with numerous other features, including a

"Who's Who in Oology"

Being a directory of the LEADING and reliable collectors, with their specialties, and owners of private museums, classified by states and provinces for ready reference, with some abroad. Send promptly data suggested, abbreviating, or amplifying with other information desired to be inserted, as—

John Smith, M. A. O. U., Boston Common, etc. Has Coll. B. & E. (birds and eggs); Specialty, Rap. (Raptors) or Wat B. (water birds); Ex. D. (exchanges desired); off. esp. sets hks. Sea B. (hawks and seabirds); Ex. Pho. (exchanges photographs of birds, etc.); W. P. Eggs (will buy same), etc.

This beats being buried in any "Naturalists' Directory," is of constant value, establishes community of interest in studies, and will be "exclusive." Send data required, marked "Directory," and include 25 cents, fee for insertion of same in the Standard Catalogue.

Important!

ALL collectors are urged and invited to suggest changes in EXCHANGE value of skins or eggs, (suggest on separate sheet for each). Catalogues of private collections also wanted for reference. Credit given those who aid. Write TONIGHT. Address,

BULLETIN

OF THE

Michigan Ornithological Club

An Illustrated Quarterly devoted to the Ornithology of the Great Lake Region

Alexander W. Blain, Jr., Editor

J. Claire Wood and Walter B. Barrows, Associates

Beginning with 1904, the BULLETIN enters upon its fifth volume. Each issue is filled with notes fresh from the field and museum. A large corps of field ornithologists are among its contributors, which makes it indispensable to all live bird students. If you want the leading field magazine of the East, you will have to read the BULLETIN. Have you seen the March issue (36 pages)? It contains besides many interesting and valuable articles the complete notes on the "Discovery of the Breeding Area of Kitland's Warbler." Fine illustrations appear in each issue. You cannot get along without the BULLETIN.

Subscription, 50 Cents per Year
Sample Copy, 15 Cents

Vols. I, II and III are out of print and cannot be supplied at any price. A few complete sets of Vol. IV (1903) can still be supplied at 50 cents per volume

Pacific Coast Avifauna, No. 4

Birds of the Huachuca Mountains, Arizona

By HARRY S. SWARTH

This 75-page pamphlet has just been issued by the Cooper Ornithological Club as the fourth of its series of special papers. We believe that it can be safely put down as the most valuable contribution to the ornithology of the middle-west of recent years. In it we find a soberly-written record of the author's three seasons of active field-work in an unique region from an avifaunal standpoint. The nesting habits of many rare species are described, and critical remarks on puzzling species are conscientiously advanced. The migration notes alone are of unusual bearing on the general subject, partly on account of the geographical position of the station. Every ORNITHOLOGIST should procure and carefully study this report.

Price, 50 Cents, Postpaid

Pacific Coast Avifauna, Nos. 1, 2, 3 and 4, (complete set, to date), \$2.00.

JUST PUBLISHED BIRDS OF CALIFORNIA

By IRENE GROSVENOR WHELOCK

THIS is the first book to absolutely cover the field. The author has personally visited and studied most of the species described, her researches extending from the southernmost to the northernmost boundaries of the state, and from the islands off the coast to the eastern coast of the Sierras. Her book is intended to be all that the most exacting student may require; her keys for the determination of the species are correct, as well as simple. For the convenience of the beginner, the publishers have supplied a chart of a bird, explaining the terms used; while a map of the State, showing the zones of distribution and the breeding ranges, adds to the usefulness of the volume.

Although Mrs. Wheelock has drawn upon various reliable sources for her accounts of the habits of the species, the publishers point out that most of her observations are original; and the charm of her own bright and entertaining phraseology adds to the interest of her statements. She herself visited the islands, and encountered hardships and inconveniences in her endeavors to secure information at first-hand.

The work is brought out in the most attractive style possible. There are 30 full-page plates and 78 text drawings, all by Bruce Horsfall, who stands in the front rank of bird delineators of today. The artist has fairly surpassed himself in his effort to provide this work with telling illustrations, and the engravers and printers have been chosen with a view of providing the most effective productions possible.

*Illustrated by Bruce Horsfall. 600 pages, limp leather, \$2.50 net.
At All Booksellers.*
