

YOU ARE NOT TOO LATE

To get name, specialty in eggs, whether exchange, buy, sell, etc., inserted in "Oologists' Directory" feature of

Taylor's Standard Egg Catalogue

(Second Edition)

The price of the Catalogue, issued in sumptuous style, is 25 cents only. It costs as much more, for insertions of all desired data in "Directory" feature of same. To all who write at once will forward two copies of first edition.

I have received "Oodles" of letters from prominent Oologists who are aiding with valuable suggestions—why not you? The book, which will be of convenient size, large type, up-to-date in every respect, was to be out July 20th. I have received word from New York that the electrotypes will not be here before August. This gives time to hear from many collectors. Write at once. Your Oologically,

This is Another One of Our Great Combination Offers

BIRDS AND NATURE. Monthly; 48 pages, 8x10 inches; per year, \$1.50. A magazine devoted to nature and illustrated by color photography. It is the only periodical in the world which publishes pictures of birds, animals, insects, flowers, plants, etc., in natural color.

BIRDS OF LAKESIDE AND PRAIRIE. By Edward B. Clark. This book contains field sketches of bird-life in the great Middle West. The author takes his readers afield with him and puts them in close touch with our feathered friends of lakeside, woodland and prairie.

President Roosevelt on meeting Mr. Clark quite recently, remarked: "You are the gentleman who wrote that paragraph about the prothonotary warbler. I read with great interest about that little bird—I am quite familiar with your book, Mr. Clark, and I have always wanted to meet the man who wrote it. The prothonotary warbler was a new bird to me. Up to the time of reading about it in your book I never had heard of this specimen."

THE FAIRIES THAT RUN THE WORLD AND HOW THEY DO IT. By Ernest Vincent Wright. 110 pages, cloth, 30 full page illustrations. The subjects dealt with in this little book are well known to children and many pleasant thoughts regarding the workings of nature may be derived from its pages.

WILD BIRDS IN CITY PARKS. By Herbert Eugene Walter and Alice Hall Walter. Pocket edition, pp. 66, cloth, with chart showing Migration of Birds. New edition, entirely rewritten, enlarged, and including 145 birds, both land and water. The object of this little book is to furnish those who may be interested in making the acquaintance of wild birds with a simple letter of introduction to one hundred interesting birds.

25 BIRDS AND NATURE PICTURES.

"These pictures are so natural that it almost seems as if the creature represented is going to start out of the page and escape."—Chicago Record-Herald.
