## **YOUR ATTENTION, please!**

Except for the few members who live within reach of the monthly meetings held in Berkeley and Los Angeles, the main function of the

### **COOPER ORNITHOLOGICAL CLUB**

is the publication and distribution of ornithological literature. Its entire income is devoted to this purpose. Even with the limited income so far developed, the output has, we believe, been creditable. The continued growth of the Club indicates that a service is being rendered.

For many years the Club has been endeavoring to insure its future by the establishment of a permanent

### **ENDOWMENT FUND**

By such means only can it expect an increase of publication. Since the entire income goes into publication, every member of the Club is the direct beneficiary of any increase. It is your Club and your Endowment Fund.

It is therefore with distinct pleasure that we announce an arrangement with the representatives of Miss Ellen B. Scripps and the South Moulton Company, publishers of Dawson's

### **"BIRDS OF CALIFORNIA"**

(4 volumes) by which a substantial part of each sale of this great set of books is to be paid into the Endowment Fund of the Cooper Club, when such sale is turned in through one or other officer of the Club.

When you buy your set, or when your friends do, see that the subscription is sent **direct to the club** and thus yourself have a hand in building up the Endowment Fund. Perhaps your public library can be persuaded to buy the set, or some one in your city can be interested in presenting the set to the library.

One need have no hesitancy in urging the purchase of these splendid books. Miss Scripps spared no expense to make them the finest of their kind. They are certain to be a source of perpetual pleasure to every nature lover who possesses them.
