**NOTICE**—The Canadian Society of Wildlife and Fishery Biologists has produced a directory of current research in Canada in wildlife and fishery biology. Projects are listed by province, agency, title and leader, with probable date of completion. The directory contains some 705 entries which are fully indexed and cross-indexed. It is mimeographed and in ring binding so that new material can be added. Present plans are to revise the directory every two years. The directory is free to members of the Canadian Society, or can be purchased for \$3.00.—SECRETARY-TREASURER, C.S.W.F.B., *P. O. Box 2292, Postal Station "D," Ottawa, Ontario, Canada.*

## MUSIC IN NATURE

By Loye Miller

Improved reproduction on one 12-inch nonbreakable microgroove vinylite long-playing phonograph record with over 50 bird songs and animal sounds.

This popular talk by Loye Miller is again available. *Music in Nature* is an informal discussion of the five elements of music—time, tone, tune, timbre, touch—in relationship to bird songs and animal sounds. These sounds are reproduced by Professor Miller's own vocal and whistled imitations. Highlights are the four calls of the California Quail, the songs and cries of the goldfinch, wolf, horned owl, tree-toad, and meadowlark, and the amazing combination of tongue flutter, whistle, and grunt used to reproduce the sound of the Sandhill Crane. Fifty of the bird songs and other animal sounds are applicable in any part of North America. Dr. Miller uses these sounds to present his philosophy that all listeners can grow to appreciate their environment more fully. This material is ideally suited for nearly all grades of classroom instruction and is being used by many school districts throughout the country.

Loye Miller has made field studies of natural sounds for more than fifty years. As Professor of Biology in the University of California at Los Angeles, he has long been noted as a scientist and teacher and for his talks about birds and other animals.

The University of California has given The Cooper Ornithological Society the right to sell *Music in Nature* as a contribution to Ornithology.

This 12-inch pressing, including attractive sleeve, only \$3.95. This includes delivery cost and State Sales Tax in California.
