Postal announcements forthcoming.

Naturalist's Color Guide

by Frank B. Smithe

Part I is a looseleaf binder with 86 measured colors and correlating names and numbers. Part II is a paperbound supplement that explains how the colors were selected from Ridgway's 1912 work and gives valuable information. The **Naturalist's Color Guide** is important to all naturalists, whether professional or amateur, and ornithologists will find it essential as a common reference in identification and description. Part I is \$9.00, Part II is \$5.00. Both parts bought together are \$12.00.
