RECENT PUBLICATION

A Field Guide to the Nests, Eggs and Nestlings of North American Birds.—Colin Harrison. 1978. William Collins Publishers, Inc., Cleveland, Ohio. 416 p. \$11.95. This book follows the same plan as the author's guide to European nests, eggs, and nestlings. Identification keys lead to the species accounts, where nesting habitat, nest structure, breeding season, eggs, incubation, nestling, and nestling period are described succinctly. The book is illustrated with many drawings

and color paintings of nests and nestlings by Philip Burton and over 620 color photographs of individual eggs. A waterproof cover adds to its practicality for field use. In addition to serving its intended purpose, the book is useful as a source of basic information on the breeding habits of North American birds. Compare it with *Hal H. Harrison's* field guide to nests in the Peterson Field Guide Series (1975. Houghton Mifflin Co.).
