

# BIRDS OF TROPICAL AMERICA

by Alexander F. Skutch

Drawings by Dana Gardner

Among the thirty-four species of tropical American birds whose biographies fill this book are toucans, motmots, jacamars, tinamous, puffbirds, and potoos—birds whose very names evoke visions of the grand, mysterious forests of Central and South America and the fascinating feathered creatures who dwell there. For over five decades Skutch spared no effort to learn all he could about them as living creatures. His lovely, poignant accounts of their lives are equaled by the drawings of talented young artist Dana Gardner and by splendid photographs by the author \$29.95

## AVES BRASILEIRAS

BIRDS OF BRAZIL IDENTIFICATION GUIDE

Now it's easy to discover the name of any Brazilian bird. In this book, J.D. Frisch gives the scientific name, the popular names (in Portuguese, Spanish and English) along with the habits and more than 1,560 drawings that facilitate identification by illustrating the original colors. Printed in Italy by Mondadori, this bestseller in its field now includes an Addendum translating the major parts of the text into English.

Size 6" x 9"  
356 pages

*Birds of Fiji, Tonga and Samoa*, is the first definitive account of the ornithology of this island region in the South-west Pacific, where there is a lack of and a growing demand for ornithological material. This book is based on Dr Watling's research and experience in the region and a thorough review of the literature.

There is a species account for each resident and regular migrant bird, with sections on identification-oriented descriptions, flight, voice, food, breeding and ecology. Distribution maps are an important identification aid.

The birds are magnificently illustrated on full colour plates by Chloë Talbot-Kelly, an internationally renowned ornithological artist. She has also prepared black and white text illustrations depicting special features. Photographs by Jim Siers, foremost Pacific photographer, illustrate the bird's habitat. There is a thorough Bibliography and three indices, which provide readers with easy access to any particular bird.

The book is divided into five parts:

**Part One** — *Introduction*

- The Background
- Maps
- Ornithological History
- Composition of the Avifauna
- Ecological Isolation of Closely Related Land Birds
- Breeding and Moults
- Conservation, Species Lost and Rare or Endangered Birds
- The Fiji Region

**Part Two** — *Colour Plates*

**Part Three** — *The Land Birds*

**Part Four** — *The Sea Birds*

**Part Five** — *Appendices*

**Specifications**

Size: 216mm wide x 298mm deep.

Extent: 176 pages on fine quality offset paper.

Fifteen colour plates.

Colour photographs of the region.

Black and white sketches and photographs.

Distribution maps.

ISBN 0-908582-36-6

*Birds of Fiji, Tonga and Samoa* is available from the publishers at \$NZ45.00.
