
Bird Study

The Official Journal of the British Trust for Ornithology

Edited by **David T. Parkin** *Department of Genetics, School of Medicine, Queen's Medical Centre, Nottingham NG7 2UH*

Bird Study is the official journal of the British Trust for Ornithology, a body which has been a prime contributor to the field of ornithological research in Great Britain for many years. Published since 1954, the journal is noted for its original papers on all aspects of ornithology, especially distribution, status censusing, migration, population, habitat and breeding ecology. These include the results of BTO surveys, and occasional invited review papers; book reviews appear regularly. While the journal concentrates on the birds of Western Europe, significant papers from elsewhere are also welcomed. *Bird Study* caters for the professional and serious amateur alike and aims at the middle ground, eschewing both the frankly popular and the esoteric.

Subscription Information

Bird Study is published three times a year. Subscription rates for 1989 are £29.00 (UK), \$59.50 (USA & Canada), £35.00 (elsewhere) post free.

Ibis

Journal of the British Ornithologists' Union

Edited by **Dr Peter Jones** *Department of Forestry and Natural Resources, University of Edinburgh, King's Buildings, Edinburgh EH9 3JU, UK*

One of the most prestigious bird journals in the world, *Ibis* has been in existence since 1859. It publishes papers from both professionals and amateurs on all aspects of ornithology ranging from geographical distribution to bird behaviour, covering topics such as kin selection, altruism and breeding systems. Reviews of the ornithological literature have always been an important feature of the journal. Although it is published for the British Ornithologists' Union it is by no means exclusively British, and less than half the papers deal with British birds.

Subscription Information

Ibis is published quarterly. Subscription rates for 1989 are £72.00 (UK), \$149.00 (USA & Canada), £86.50 (overseas) post free.

Subscriptions and free specimen copies of both journals are available from the publishers at the address below.
