

NEW BOOKS IN ORNITHOLOGY

CHRISTOPHER W. THOMPSON, BOOK REVIEW EDITOR

For policies regarding what publications are cited in these new-book bibliographies, and for information regarding availability of these publications, please consult my previous bibliographies (Condor 95:242, 245-250, 95:491-494). Comments enclosed in square brackets are mine and are intended to clarify the content of the publications. For financial reasons, it is only possible to list those publications which I subjectively believe to be academically significant. However, because many other publications such as many government documents and those on feeding, attracting, housing and watching birds may be useful in various ways to ornithologists, I do maintain a computer database of these references and would be pleased to supply anyone interested with this information.
