

RECENT PUBLICATIONS ON WADERS

Compiled by N. C. Davidson

- Although considerable effort is spent trying to make these lists as complete as possible, coverage is inevitably somewhat dependant on the range of journals etc which are available to the compiler. Therefore, details of omissions and, if possible, reprints of papers are always welcome. These should be sent to N.C.Davidson, Department of Zoology, University of Durham, Science Laboratories, South Road, Durham DH1 3LE, England. Thanks to all those who have sent such information, and to M.W.Pienkowski for help. Translated titles of papers in languages other than English are bracketed: round brackets if the English translation is by the author, square brackets if by others.
