

Several comments were also received on dates of receipt. Here is a typical one: "is it possible to receive, in the future, the Bulletin on time? For example, the "April" number arrived at the end of May." Members in other continents and using surface mail suffer even greater delays, of course. One difficulty has been concerned with circulation lists, but changes to improve arrangements here are outlined in this Bulletin. The other two main problems are the trade-off between including very topical items and meeting deadlines; and the time available for editors. The former dilemma will always exist with a Bulletin in the evidently popular form it is at present. As to the latter, let's see how the new management fares!

After all this, we suspect that if we ran another questionnaire with the section "Questionnaire results" included, this would be a strong candidate for deletion. However, the results have been - and will continue to be - of great value to the officers, and we thank all those who took the trouble to reply.
