WILLIAMS, T.C., WILLIAMS, J.M. & KLOECKNER, P.D. 1986. Airspeed and heading of autumnal migrants over Hawaii. Auk 103: 634-635. (Dept. Biol., Swarthmore Coll., Swarthmore, PA 19081, U.S.A.) Early migrants (Sept.-1979) were mainly shorebirds (Lesser Golden Plover and Turnstone). Mean ground speed 42.6 km/hr. Birds were compensating for wind so as to maintain constant ground speed. Ground speed low compared to published ones, probably due to reduced flight speeds as the birds prepare for landing on Okau and Mani.
