

RECENT RECOVERIES OF WADERS RINGED IN BRITAIN AND IRELAND

compiled by Nigel & Jacque Clark

The following lists are compiled from data provided by the British Trust for Ornithology, from whom permission must be sought before using these data in publications. As usual, space does not allow us to detail all records in full. All movements of over 100 km, and recoveries of more than 3 000 days after ringing, are detailed.

Symbols. Age is coded according to EURING code, v = caught and released (i.e. controlled), vv = ring number or colour marks (dye or rings) read in the field, + = shot or killed by man, x = found dead or dying, ? = manner of recovery unknown. Co-ordinates are generally given only when the locality is first mentioned.

Oystercatcher *Haematopus ostralegus*

The durations for all recoveries are as follows: <500 days 8, 500-999 days 8, 1 000-1 999 days 5, 2 000-2 999 days 9, 3 000-3 999 days 9, 4 000-4 999 days 4, 5 000-5 999 days 3, over 6 000 days 1.
