

RECENT RECOVERIES OF WADERS

compiled by Nigel & Jacquie Clark & Phil Ireland

Once again, this issue includes recoveries originating in countries other than the British Isles. The compilers of this section are grateful to those listed below who have provided the data but the continued 'Internationalization' of the recoveries list depends on a regular supply of data. If you are able to provide data for this section or have a contact who might be willing to help please contact Phil Ireland at 27 Hainfield Drive, Solihull, West Midlands, B91 2PL, UK. Rather surprisingly, European ringing data has been less readily available than for other continents so contributions for European countries would be particularly welcome.

The following lists are compiled from data provided by the British Trust for Ornithology, Kim Lowe (Australia and New Zealand) and Graeme Backhurst (Africa).

Permission should be sought from the appropriate National Ringing Scheme before using these data in publications.

Symbols (As previous Bulletins.)

Data available for compiling list

British Isles: All recoveries reported since Bulletin 52 which are over 100 km. (Oystercatcher 400 km) or 6000 days are listed.

Africa: Recoveries listed in the Eastern Africa Ringing Report for 1981-1987.

Australia and New Zealand: A selection of recoveries from the most recent issue of The Stilt.

OYSTERCATCHER *Haematopus ostralegus*

Originating in the British Isles
