

RECENT RINGING RECOVERIES OF WADERS

compiled by Nigel & Jacquie Clark & Phil Ireland

This issue includes recoveries originating in countries other than the British Isles. The compilers of this section are grateful to those listed below who have provided the data but the continued 'Internationalization' of the recoveries list depends on a regular supply of data. If you are able to provide data for this section or have a contact who might be willing to help please contact Phil Ireland at 27 Hainfield Drive, Solihull, West Midlands, B91 2PL, UK.

The following lists are compiled from data provided by the British Trust for Ornithology, Kim Lowe (Australia and New Zealand) and Terry Oatley (South Africa).

Permission should be sought from the appropriate National Ringing Scheme before using these data in publications.

Symbols. Age is coded according to EURING code, v = caught and released (i.e. controlled), vv = ring number and colour marks (dye or rings) read in the field, + = shot or killed by man, x = found dead or dying, ? = manner of recovery unknown. Co-ordinates are generally only given when the locality is first mentioned.

Data available for compiling list

British Isles: All recoveries reported since Bulletin 55 which are over 100km. (Oystercatcher 400km) or 6000 days are listed.

South Africa: Controls and recoveries received in 1988.

Australia and New Zealand: A selection of recoveries from the most recent issue of 'The Stilt'.

OYSTERCATCHER *Haematopus ostralegus*

Originating in the British Isles. In addition to those listed below there were 27 movements between Scotland and England/Wales; 4 movements between Scotland and France; 15 movements wholly within Scotland. 9 birds from the Wash and 5 from elsewhere in Britain were recovered in Norway in the breeding season.
