

# RECENT PUBLICATIONS ON WADERS 50

Compiled by Gudmundur A. Gudmundsson

This is the 50th list of recent publications on waders that appears in the WSG Bulletin. The first four lists came out rather irregularly, but since Bulletin 13 references to new literature about waders have been provided to the members of the Wader Study Group in every issue. All together 6573 publications have been listed. Compilers have been, in order of appearance, P.I. Stanley (lists 1-2), M.W. Pienkowski (3-20), N.C. Davidson (21-24), T. Piersma (25-45) and GAG (46-50).

All help is most welcome to make the list as complete and up to date as possible. If you are aware of that some journals that you have access to are badly covered or not at all, or that your name is not listed as often as it should be, then please send me a line. Remember to include, if available, the address of the first author - that increases the usefulness. Also, include translations of titles if they are in languages other than English. Please send new titles, abstracts, reprints, omissions or corrections to:  
Gudmundur A. Gudmundsson, Department of Ecology, University of Lund, Ecology Building, S-223 62 LUND, Sweden.

For help with this issue I am grateful to Per Andell, Ian Bainbridge, Paul Eric Jonsson and Theunis Piersma.

Translated titles from languages other than English are bracketed; round brackets if the translation is by the author(s), square brackets if not.
