COMPILED BY HENK KOFFIJBERG

Glenn Millerweg 102, NL-1311 RW Almere, The Netherlands, e-mail: koffijberg@wanadoo.nl

In trying to make these lists as complete as possible, and the next one even more complete and up to date, your help is necessary!! Please send new titles, abstracts, reprints, copies, reports, and (important too!) omissions or corrections to: **Henk Koffijberg, Glenn Millerweg 102, NL-1311 RW Almere, The Netherlands, e-mail: koffijberg@wanadoo.nl.**

Remember to include, if possible, the address of the first author, and translations of titles if they are in other languages than English.

For help with this issue I am very grateful to J. Melter, T. Gunnarsson, W. Meissner, M. Boschert, H. Insley.

Translated titles from languages other than English are bracketed; with round brackets if the translation is by the author(s), square brackets if not.

N.B. a copy of your paper or abstract would be very helpful to enable me to add some keywords or give added annotation to the titles.

### BREEDING

- Adams, N.J., Kerley, G.I.H. & Watson, J.J.** 1999. Disturbance of incubating African Black Oystercatchers: is heating of exposed eggs a problem? *Ostrich* 70: 225–228. *Haematopus moquini*, overheating of eggs doesn't seem to influence breeding success.
- Amat, J.A., Fraga, R.M. & Arroyo, G.M.** 2001. Variations in body condition and egg characteristics of female Kentish Plovers *Charadrius alexandrinus*. *Ardea* 89(2): 293–299. (Biol. Stn. Doñana, CSIC, Apartado 1056, E-41080 Sevilla, Spain, e-mail: aguilar@cica.es)
- Amat, J.A., Fraga, R.M. & Arroyo, G.M.** 2001. Intraclutch egg-size variation and offspring survival in the Kentish Plover *Charadrius alexandrinus*. *Ibis* 143: 17–27.
- Amat, J.A., Visser, G.H., Pérez-Hurtado, A. & Arroyo, G.M.** 2000. Brood desertion by female shorebirds: a test of the differential parental capacity hypothesis on Kentish Plovers. *Proc. R. Soc. Lond. B* 267: 2171–2176. *Charadrius alexandrinus*.
- Blomqvist, D. & Johansson, O.C.** 2000. A comment on successive clutches and breeding system in Lapwings *Vanellus vanellus*. *Ibis* 142(2): 323.
- Byrkjedal, I., Gronstol, G.B., Hafsmo, J.E. & Lislevand, T.** 2000. Chick punishment and chick adoption in Northern Lapwings. *Ornis Fenn.* 77(2): 89–92. *Vanellus vanellus*.
- Cotter, P.A. & Andres, B.A.** 2000. Nest density of shorebirds from the Beaufort Sea coast, Alaska. *Can. Field-Nat.* 114: 287–291.
- Currie, D., Valkama, J., Berg, A., Boschert, M., Norrdahl, K., Hänninen, M., Korpimäki, E., Pöyri, V. & Hemminki, O.** 2001. Sex roles, parental effort and offspring desertion in the monogamous Eurasian Curlew *Numenius arquata*. *Ibis* 143: 642–650. (Sect. Ecol., Dept. Biol., Univ. Turku, FIN-20014 Turku, Finland)
- Davis, W.E.D. Jr. & Recher, H.F.** 2000. False-brooding behaviour in the Red-capped Plover *Charadrius ruficapillus*. *Aust. Bird Watcher* 18: 248–249. (Coll. Gen. Stud., Boston Univ., Boston, MA 02215, USA)
- Duncan, A., Duncan, R., Rae, R., Rebecca, G.W. & Stewart, B.J.** 2001. Roof and ground nesting Oystercatchers in Aberdeen. *Scott. Birds* 22: 1–8. *Haematopus ostralegus* population in Aberdeen in 1993 of at least 275 pairs of which 205 nested on roofs. Productivity for a sample of roof nesting birds was 0.8 fledged young per pair.
- French, P., Insley, H., Siriwardena, G. & Buxton, N.** 2000. The breeding success of a population of Lapwings in part of Strathspey 1996–1998. *Scott. Birds* 21: 98–108. (e-mail Insley: hugh.insley@tinyworld.co.uk). 630 Nesting attempts of *Vanellus vanellus* were monitored. Mean clutch size (3.6) and brood size at hatching (3.0) remained constant over the study period. Nest failure rate didn't vary significantly between years and nest survival from laying to hatching was about 60%. However, there were highly significant differences in the daily failure rates for nests across the 8 study sites used. Combining all 8 sites, survival of chicks from hatching to fledging varied between 9.5% and 17.5%.
- Handel, C.M. & Gill Jr., R.E.** 2000. Mate fidelity and breeding site tenacity in a monogamous sandpiper, the Black Turnstone. *Anim. Behav.* 60: 471–481. *Arenaria melanocephala*.
- Larsen, T.** 2000. Influence of rodent density on nesting associations involving the Bar-tailed Godwit *Limosa lapponica*. *Ibis* 142: 476–481.
- Mabee, T.J. & Estelle, V.B.** 2000. Assessing the effectiveness of predator exclosures for plovers. *Wilson Bull.* 112(1): 14–20. (ABR Inc., PO Box 249, Forest Grove, OR 97116, USA). *Charadrius melodus*, *C. alexandrinus*, *C. vociferus*.
- Parish, D.M.B., Thompson, P.S. & Coulson, J.C.** 2001. Effects of age, cohort and individual on breeding performance in the Lapwing *Vanellus vanellus*. *Ibis* 143(2): 288–295.
- Powell, A.N. & Powell, A.N.** 2001. Habitat characteristics and nest success of Snowy Plovers associated with California Least Tern colonies. *Condor* 103(4): 785–792. (USGS, West. Ecol. Res. Ctr., Dept. Biol., San Diego, CA 92182, USA). *Charadrius alexandrinus*.

- Reed, J.M., Gray, E.M., Lewis, D., Oring, L.W., Coleman, R., Burr, T. & Luscomb, P.** 1999. Growth patterns of Hawaiian stilt chicks. *Wilson Bull.* 111(4): 478–487. *Himantopus mexicanus knudseni*.
- Rusticali, R., Scarton, F. & Valle, R.** 1999. Habitat selection and hatching success of Eurasian Oystercatchers in relation to nesting Yellow-legged Gulls and human presence. *Waterbirds* 22: 367–375. (Valle: Castello 618/E, I-30122, Venezia, Italy, e-mail: robevalle@tin.it). *Haematopus ostralegus*.
- Schmechel, F.** 2001. *Aspects of habitat selection, population dynamics, and breeding biology of the endangered Chatham Island oystercatcher (Haematopus chathamensis)*. PhD thesis, Lincoln Univ. (Ecol. & Entomol. Grp., PO Box 84, Lincoln Univ., Canterbury, New Zealand, e-mail: Schmechf@lincoln.ac.nz).
- Schreiber, M.** 2001. Verbreitung und Bruterfolg des Kiebitzes *Vanellus vanellus* im südwestlichen Niedersachsen in Abhängigkeit von ausgewählten bodenkundlichen Parametern und landwirtschaftlicher Nutzung. (Distribution and breeding success of the Lapwing *Vanellus vanellus* in south-west Lower Saxony in relation to soil types and agricultural land use). *Vogelwelt* 122(2): 55–65. In German with English summary. (Blankenburger Str. 34, D-49565 Bramsche/Epe, Germany, e-mail: Schreiber.Umweltplanung@t-online.de)

With the advent of a mega-dam building the Curlew Sandpiper has increased from a rare visitor to a common southbound migrant with increasing over-summering and over-wintering. Initially mainly young birds were observed, but now an established adult population visits the area.
- Tree, A.J.** 2001. Kittlitz's Plover as an intra-African migrant. *Honeyguide* 47(1): 10–15. *Charadrius pecuarius* has adapted successfully to man-made aquatic habitats. Strong movements into southern Africa during summer rains with all populations from higher rainfall areas at least as far north as the Congo and Tanzania migrating. Extent of southward penetration dependent on availability of suitable water bodies. Migrating birds accumulate lipid deposits sufficient for non-stop flights of up to 2000 km. Coastal populations relatively sedentary, inland southern birds nomadic, northern birds migratory/nomadic.
- Tree, A.J.** 2001. The occurrence of Painted Snipe in Zimbabwe and neighbouring countries. *Honeyguide* 47(2): 165–169. *Rostratula benghalensis* has a distinct degree of seasonality in occurrence in lower rainfall areas and greater stability in Zambia. General pattern of movement probably north–south but south of Zambesi tendency for overlay of east–west movement. Possibility of more southerly birds leap-frogging more sedentary populations and originating further north in Africa. No proved examples of site-fidelity during ringing studies.
