

# Wader Study Group

Volume 100, April 2003

*Continued from outside back cover*

<b>Monitoring the shorebirds of North America: towards a unified approach</b> S.K. Skagen, J. Bart, B. Andres, S. Brown, G. Donaldson, B. Harrington, V. Johnston, S.L. Jones & R.I.G. Morrison	102
<b>Threatened shorebird species of the East Asian–Australasian Flyway: significance for Australian wader study groups</b> D. Milton	105
<b>The Yellow Sea – a race against time</b> M. Barter	111
<b>The “annual life-cycle approach” in volunteer studies of migratory waders</b> T.M. van der Have	114
<b>Cross-seasonal and cross-disciplinary studies of migratory shorebirds</b> S. Nebel & D.B. Lank	118
<b>Plumage colour and pattern in waders</b> P.N. Ferns	122
<b>Wader migration on the changing predator landscape</b> R.W. Butler, R.C. Ydenberg & D.B. Lank	130
<b>Raptor predation on non-breeding shorebirds: some thoughts for the future</b> D.P. Whitfield	134
<b>Use of radio telemetry in studies of shorebirds: past contributions and future directions</b> N. Warnock & J.Y. Takekawa	138
<b>Conservation of long-distance migratory wader populations: reproductive consequences of events occurring in distant staging sites</b> H. Schekkerman, I. Tulp & B. Ens	151
<b>The interaction between migration strategy and population dynamics: is there higher winter mortality in short-distance migrants and lower juvenilesurvival in long-distance migrants?</b> G. Scheiffarth	157
<b>Wader studies for the 21st century – supporting international conservation</b> T. Fox	159
<b>Estimation of survival rates for wader populations: a review of mark-recapture methods</b> B.K. Sandercock	163
<b>The need for greater use of historical population data</b> H. Boyd	175
<b>The importance of long-term monitoring of reproduction rates in waders</b> C. Minton	178
<b>Fitness, demographic rates and managing the coast for wader populations</b> J.D. Goss-Custard	183
<b>Predicting wader mortality and body condition from optimal foraging behaviour</b> R.A. Stillman	192
<b>Estimating bird population sizes and trends: what are the hard data, what are the unavoidable assumptions? A plea for good documentation</b> J. Brouwer, N.E. Baker & B. Trolliet	197
<b>Wader populations are declining – how will we elucidate the reasons?</b> C. Zöckler, S. Delany & W. Hagemeyer	202
<b>A century of wader studies? Not quite, but it should be!</b> D.W. Yalden	212
<b>Publication bias in waders</b> G.H. Thomas, T. Székely & W.J. Sutherland	216

# Wader Study Group Bulletin

Volume 100, April 2003

<b>Editorial</b>	1
<b>Peter Evans, 1937–2001: A tribute</b>	
R. Drent	2
<b>“Coastal” versus “inland” shorebird species: interlinked fundamental dichotomies between their life- and demographic histories?</b>	
T. Piersma	5
<b>Pacific and American Golden-Plovers: reflections on conservation needs</b>	
O.W. Johnson	10
<b>Waders, hedgehogs and machair: research and conservation lessons from the Outer Hebrides</b>	
D. Jackson	14
<b>The Wrybill <i>Anarhynchus frontalis</i>: a brief review of status, threats and work in progress</b>	
A.C. Riegen & J.E. Dowding	20
<b>Plugging the gaps – winter studies of Eurasian Golden Plovers and Northern Lapwings</b>	
S. Gillings	25
<b>Calidrid conservation: unrequited needs</b>	
R.W. Elner & D.A. Seaman	30
<b>The implications for conservation of age- and sex-related feeding specialisations in shorebirds</b>	
Sarah E.A. Le V. Dit Durell	35
<b>Integrating marine and terrestrial habitats in shorebird conservation planning</b>	
P.C.F. Shepherd, L.J. Evans Ogden & D.B. Lank	40
<b>Wadden Sea saltmarshes: Ecological trap or hideaway for breeding Redshanks <i>Tringa totanus</i>?</b>	
S. Thyen & K.-M. Exo	43
<b>Spartina invasion of Pacific coast estuaries in the United States: implications for shorebird conservation</b>	
J.B. Buchanan	47
<b>Birds and offshore wind farms: a hot topic in marine ecology</b>	
K.-M. Exo, O. Hüppop & S. Garthe	50
<b>Australia’s temporary wetlands: what determines their suitability as feeding and breeding sites for waders?</b>	
I.R. Taylor	54
<b>Shorebird management during the non-breeding season – an overview of needs, opportunities, and management concepts</b>	
B.A. Harrington	59
<b>Can we recreate or restore intertidal habitats for shorebirds?</b>	
P.W. Atkinson	67
<b>High-tide roost choice by coastal waders</b>	
D.I. Rogers	73
<b>Climate change and the potential impact on breeding waders in the UK</b>	
J. Smart & J.A. Gill	80
<b>Predicting the impact of climatic change on Arctic-breeding waders</b>	
M.M. Rehfisch & H.Q.P. Crick	86
<b>Global activities on the conservation, management and sustainable use of migratory waterbirds: an integrated flyway/ecosystem approach</b>	
G.C. Boere	96
