

NOTES AND NEWS

The Spring Field Meeting of NEBBA was held 2-4 June 1972 in Manomet, Massachusetts, with about 50 members and their guests present. The Council met on Friday evening, 2 June, the meeting presided over by President Kennard. Reports from the Secretary, Treasurer, Assistant Treasurer, and Editor were received and approved. Forty-eight new members were elected to NEBBA. The Council discussed at some length what, if any, sum of money could be given to the Review Editor for secretarial help. It was decided that only a nominal sum could be afforded for such purpose at this time. Also discussed were: a new set of by-laws, 10-year index to *Bird-Banding*, a nominating committee, and mist net accounts.

Paper sessions were held on Saturday, 3 June. Included in the papers given on Saturday were: "Long Distance Shorebird Migration" by Joseph A. Hager, "Gyr Falcon Banding in Greenland" by William Maddox, "Bird Counts, with a Difference" by Kenneth Youngstrom, and "Research at Long Point Bird Observatory" by Michael Bradstreet. The dinner on Saturday night was at the Governor Carver Motor Inn. Two trips were arranged for Sunday, 4 June: a boat trip for pelagic birds and a six-mile trip down Long Beach at Plymouth.

The annual meeting of NEBBA will be held at St. Anselm's College, Manchester, New Hampshire, Saturday, 4 November, at 1:30 p.m. There will be scientific sessions in the morning and in the afternoon following the annual meeting. The council will meet at the home of Dr. John H. Kennard nearby in Bedford Friday night. A boat trip is scheduled for Alcids and other seabirds from Portsmouth, New Hampshire on Sunday, 5 November.

All those wishing, or willing, to contribute to the scientific program please contact the program chairman: Prof. Roger W. Lawrence, Lawrence Road, Merrimack, New Hampshire 03054.

NEBBA MIST NETS

The Northeastern Bird-Banding Association, Inc., imports 14 types of mist nets as a service to our members and other netters, and prices them close to actual cost. Net income has been used to build up the needed working capital, and to support *Bird-Banding's* indices—reference tools which don't pay their own way fully.

This list replaces all previous lists. Prices had to be increased significantly to reflect the higher exchange value of the yen, plus a small allowance for other costs that have increased since the last prices were set in 1969. The base price and discount to members/subscribers have been adjusted to reflect current subscription rates, but for most net users this is not an increase in itself.

Nets are in stock for immediate shipment. We have generally been able to fill orders promptly, but delays may occur for a variety of reasons, such as strikes, or customs, or my absence on trips. If you know your needs in advance, an early order may avoid delay in your netting project.

The prices shown include shipment by surface parcel post within the U. S. For shipment by air parcel post, add 10%. If desired, we can ship by parcel post "special delivery" or "special handling," at the actual extra cost. We make every effort to deliver by desired dates, but some requests are unrealistic, even to the point of asking for a date earlier than the day the order reaches us. Requests should keep in mind the inadequacies of the postal service.

For shipment outside the U. S. by surface parcel post, add 10% (of this 5% is for additional postage and 5% for additional handling, such as preparing customs forms). For shipment outside the U. S. by air parcel post, we charge the actual postage instead of the 10% (the rates are high, particularly after a 10% increase last summer).

On any shipment outside the U. S., the purchaser (1) arranges any import license or other formalities; (2) pays any customs duties or other charges levied by his country; and (3) should remit in U. S. dollars or in currency freely convertible into U. S. funds at par. If special customs invoice forms have to be filled out, the necessary number of blank copies should be furnished with the order (except for Canada), as we have no quick or convenient way to obtain them here.

We regret that we cannot ship by other methods, such as United Parcel or air freight, partly because we have no convenient way for shipments of that sort to be picked up. Also, the light weight of nets makes parcel post the most economical method in most cases. Our volunteer, part-time labor is not prepared to handle the substantial and complicated extra paper work often involved. Note that we do not ship via freight forwarders or consolidators.

Connecticut customers should allow for the state sales tax (currently 7%), unless exempt for charitable, educational or governmental reasons. Sales are not subject to local sales taxes outside Connecticut, inasmuch as NEBBA has no premises or operations outside Connecticut for the sale of nets.

Institutions may order by purchase order, without advance payment (terms: 30 days net, and the cash discount does not apply). Institutions may order by letter instead of purchase order, as long as that method complies with the institution's own internal rules for purchases. If any invoice other than the standard NEBBA form is required, this must be specified at the time of the order, and a set of the forms provided. New members or subscribers may include payment in the same check as for the nets.

DESCRIPTION OF NEBBA MIST NETS

All NEBBA mist nets are black, the best grade we can obtain in Japan. All have nylon mesh and shelfstrings, and those obtained most recently also have nylon shelfloops (except that type KTX is made of tetoron—a polyester—instead).

Type	Length (meters)	Height (meters)	Shelves	Mesh (mm)	Denier	Tethered	Extra-full mesh
ATX	12	2.6	4	36	70	yes	yes
B	6	1.2	2	36	70	no	no
CTX	12	2.6	4	61	110	yes	yes
DTX	6	2.6	4	36	70	yes	yes
E	12	2.4	2	121	210	no	no
ETX	12	2.6	2	121	210	yes	yes
F	12	2.2	4	24	70	no	no
FTX	12	2.6	4	24	70	yes	yes
G	6	2.2	4	24	70	no	no
GTX	6	2.4	4	24	70	yes	yes
HTX	12	2.6	4	30	70	yes	yes
J	6	2.4	4	30	70	no	no
JTX	6	2.6	4	30	70	yes	yes
KTX	12	2.6	4	36	75	yes	yes

Meter: about 39". 12 meters = about 41' between poles. 2.4 m = about 7' as set.
Millimeter (mm): 25mm = about one inch; 36mm = about 1½".

Height: as designated by the manufacturer (the user can vary the height of the top shelfstring from the ground somewhat, and must allow some slack in order to form shelf pockets).

Mesh: figures are "stretched" (on 36mm., the unstretched side of the square of mesh is about 3/4").

Denier: weight of thread (lower numbers show a lighter thread). All yarn is two-ply, except 210 denier which is four-ply.

PRICES OF NEBBA MIST NETS

Net type	1	2	3	4	5	6	7	8	9
ATX	\$6.35	.80	.25	.25	5.55	5.30	5.05	6.10	5.30
B	2.40	.30	.10	.10	2.10	2.00	1.90	2.30	2.00
CTX	7.35	.80	.25	.25	6.55	6.30	6.05	7.10	6.30
DTX	3.60	.40	.15	.15	3.20	3.05	2.90	3.45	3.05
E	6.05	.80	.25	.25	5.25	5.00	4.75	5.80	5.00
ETX	7.85	.80	.25	.25	7.05	6.80	6.55	7.60	6.80
F	6.15	.80	.25	.25	5.35	5.10	4.85	5.90	5.10
FTX	8.45	.80	.25	.25	7.65	7.40	7.15	8.20	7.40
G	3.55	.40	.15	.15	3.15	3.00	2.85	3.40	3.00
GTX	4.15	.40	.15	.15	3.75	3.60	3.45	4.00	3.60
HTX	8.00	.80	.25	.25	7.20	6.95	6.70	7.75	6.95
J	3.35	.40	.15	.15	2.95	2.80	2.65	3.20	2.80
JTX	4.40	.40	.15	.15	4.00	3.85	3.70	4.25	3.85
KTX	6.85	.80	.25	.25	6.05	5.80	5.55	6.60	5.80

EXPLANATION OF COLUMN HEADINGS

1. Base price.
2. Discount if purchaser member of NEBBA or subscribes to *Bird-Banding*.
3. Cash discount (individuals should send check or money order with net order).
4. Quantity discount (10 or more nets, one type or mixed types, shipped at one time to one address, not more than one invoice sent).
5. Price, cols. 1 & 2 (member/subscriber, not cash or quantity discounts).
6. Price, cols. 1, 2 & 3 (member/subscriber, and cash, not quantity discount).
7. Price, cols. 1 through 4 (all discounts).
8. Price, cols. 1 & 3 (cash, not member/subscriber or quantity discounts).
9. Price, cols. 1, 2 & 4 (member/subscriber, and quantity, not cash discount).

Permits to band birds in the U. S. or Canada do not authorize the use of nets unless the permit is specifically endorsed.

Please show the applicable permit number on every order. Institutions ordering by purchase order should always show the individual who will be responsible for use of the nets.

NEBBA sells nets only for scientific purposes, to individuals or institutions that appear qualified to use them. We will decline sales to anyone whose qualifications appear inadequate or unproven. Nets will not be sold for purposes such as control of the numbers of birds, or for commercial collecting.

CHOICE OF MIST NET TYPES

While the choice of types is a matter of personal preference to some extent, some general guides may be outlined.

First, determine the best size of mesh for your purposes, depending on the species to be captured. No one size of mesh can be efficient for all sizes of birds; outside the proper range of size, the net may be inefficient or tangled, or the bird may damage the net.

24mm: specialty size, for kinglets, small titmice, or the smallest wood warblers.

30mm: recommended for wood warblers in general. The line of peak efficiency between this and 36mm falls between birds taking U. S. band size 1 or less (30mm) and those taking size 1B or larger (36mm). See "The Comparative Efficiency of 30 and 36mm Mesh in Mist Nets," by Mary A. Heimerdinger and Robert C. Leberman, *Bird-Banding*, 37(4): 280-285, 1966.

36mm: the general-purpose size for small birds (see discussion above under 30mm).

61mm: the largest thrushes, doves, woodcock, grackles, medium-sized shorebirds.

121mm: grouse, large shorebirds, small to medium-sized ducks and hawks.

Next, consider net length. Use 12-meter types if you have the space, and 6-meter generally only where space is limited.

Finally, consider tethering (if NEBBA carries both tethered and untethered). This means that the top edge has an extra shelfstring, tied to the regular shelfstring and the mesh itself about every 10". This edge is marked by white shelf-loops. All our tethered nets now have extra-full mesh: vertically, as shown in the list, and also about 10% more horizontally. By comparison, type A had about 150 meshes vertically. Tethering permits use under somewhat more windy conditions, though not in high winds, rain, or cold.

Unless you are deliberately preparing for different conditions, your choice of mesh should be consistent in different net lengths. For example, if you are ordering primarily type ATX, any 6-meter net ordered should be DTX, not GTX or JTX.

Net orders or inquiries should be directed to: Mr. E. A. Bergstrom, 37 Old Brook Road, West Hartford, Conn. 06117 U. S. A.
