

areas near LaCrosse, Wisconsin, and Keokuk, Iowa. The colors used were blue, yellow, and pink. Any observation of color-marked canvasbacks should be reported to the *Northern Prairie Wildlife Research Center, P. O. Box 1747, Jamestown, North Dakota 58401*. The following information is requested: observer (name and address), date, time, location of observation (be specific), and color of the bird (be descriptive). In addition, information on the activity of the bird, size of the flock, and species of ducks associated with the marked bird would be helpful. This research on the migrational habitat and destinations of the canvasbacks is part of a comprehensive investigation to identify major factors influencing the population status of this species. Any observations of these color-marked canvasbacks would be greatly appreciated.

SIGHTING OF COLOR-DYED ROYAL TERN

My field notes reveal a 1972 observation of a color-dyed Royal Tern, *Thalasseus maximus*. Potential marker of this bird may write for the meager details.—**JACK P. HAILMAN**, *Department of Zoology, University of Wisconsin, Madison, Wisc. 53706*.
