# The Wheeler Guides

## Raptors of North America

**Brian K. Wheeler**

These books are the best and most complete guides to North American hawks, eagles, and other raptors ever published. Abundantly illustrated with hundreds of full-color, high-quality photographs, they are essential for anyone seeking to identify these notoriously hard-to-identify birds. The range maps are the most accurate and largest ever produced for North American raptors.

### Raptors of Eastern North America

"A highly significant contribution to the field. Wheeler has accomplished what no other guide has done for any group of birds. The quality of photography, scope and depth on plumages, races, and variations, are unequalled. The range maps

are stellar—the best ever done for any guide. It is the ultimate raptor reference and will be for decades to come."—Clay Sutton

559 color illustrations. 37 maps.

### Raptors of Western North America

"Brian Wheeler's background as a raptor artist and photographer combined with his extensive field experience provide the foundation for an excellent book. The detailed plumage descriptions of each species and sub-species,

600+ newly published raptor images plus extensive range maps and migration data will appeal to the general birding community and ensure that this guide becomes the reference book of raptor enthusiasts."—Ned Harris
