

# A Telemetry Receiver Designed with The Researcher in Mind

*What you've been waiting for!*

Finally, a highly sensitive 999 channel synthesized telemetry receiver that weighs less than 13 ounces, is completely user programmable and offers variable scan rates over all frequencies. For each animal being tracked, the large LCD display provides not only the frequency (to 100Hz) and channel number, but also a 7 character alphanumeric comment field and a digital signal strength meter. Stop carrying receivers that are the size of a lunch box or cost over \$1500. The features and performance of the new R-1000 pocket sized telemetry receiver will impress you, and the price will convince you.

These illustrated reviews provide comprehensive summaries of the current knowledge of each species, with range maps and an extensive list of references.

Buteo Books is pleased to offer these individual species accounts for \$7.50 each. All 716 profiles are listed in taxonomic order on our website (conforming with the Seventh Edition of the A.O.U. Check-list of North American Birds). Singles may be ordered by contacting Buteo Books. Shipping and handling is \$4 for the first profile and \$1 for each additional profile to a maximum of \$10 per order.
