The Table of Contents for this issue will be found on the inside back cover

## AUDUBON'S VERY OWN WILD BIRD FOOD FORMULATION IS FINALLY AVAILABLE

The National Audubon Society has recognized the need for a high quality wild bird food, because there were two major problems in currently available wild bird food mixtures: 1) many were not tested for Aflatoxin (a known carcinogen); 2) nothing readily available had as varied and balanced a mixture as we could hope for.

The result is finally available to lovers of wild birds. Audubon's Wild Bird Food Mixture contains nine carefully chosen elements from eight different places—and tested against Aflatoxin contamination. The mixture is formulated under the direction of the National Audubon Society and delivered right to your home.

Now you have the opportunity to buy Audubon's Wild Bird Food Mixture. Finest Grade Sunflower Seeds or Niger Seeds.

These purchases will not only support wild birds in your area, but will also help to support the National Audubon Society's goals and programs. And that helps everybody.

Yes, I would like to have the finest bird food available. And if not satisfied I will receive a full refund.

- Bag(s) of Audubon Wild Bird Food Mixture at \$11.95\* per 10 kilo (22 lb) bag. (Price includes delivery.)  
 Bag(s) Audubon Finest Sunflower Seeds at \$11.95\* per 10 kilo (22 lb) bag. (Price includes delivery.)  
 Bag(s) Audubon Niger Seeds at \$8.95\* per 2 kilo (4.4 lb) bag. (Price includes delivery.)

## Nothing looks at life like Leitz.

How can you get this close to wildlife without missing a single detail?

With Leitz optical excellence, of course.

Leitz Trinovids® have the finest optical systems of any binocular in the world.

Trim, flat and nicely compact, Trinovids more than equal the performance of the larger, bulkier binoculars.

Viewing angle is most like human vision, so it doesn't seem like you're

peering through binoculars. You get bright, needle-shape images right to the extremes of the entire field, even while wearing eyeglasses. Or even in twilight.

So if you want a closer look at life, try looking into a pair of Trinovid binoculars by Leitz.

E. Leitz  
Rockleigh, N.J. 07647
