Carl Zeiss Birding and
Observation Product Specialist

In 20 years of testing the best in birding optics I have never
seen binoculars that have the fine color definition of the FLs. Because Fluoride glass provides exceptional correction for false
color fringes in the image, and our thin lens, multiple-element,
Advanced Optical System provides the highest resolution, your
first look at a Bluejay or Bluebird through a VICTORY is going
to come as a revelation. Where other glasses blend the hues to a
general impression of blue, the FLs show every subtle shade. It is
breathtaking, startling, so unlike the view you are used to, with
so much more color detail, from full daylight to deepest twilight
and shadow, that birders regularly tell me they see things
through the FLs that they have never seen before. I believe them.

At Zeiss, we are dedicated to using our technical expertise,
developed over 150 years in the optical business, to ensure that
you get the most out of every moment in the field. There is so
much more to see, and so little time. You owe it to yourself to
see everything the VICTORY FLs can show you.

Available in 8x32, 10x32, 7x42, 8x42 (shown here) and 10x42.
Now available in 8x56 and 10x56.
Visit your local Zeiss dealer, call 1-800-441-3005 or log onto

ON THE COVER: This juvenile Short-tailed Albatross photographed off Point Pinos, Monterey County, California, 12 August 2005 was seen in July near Middle Farallon Island, San Francisco County. Sadly, it was found dead at Morro Bay, San Luis Obispo County, and is now a specimen at the Los Angeles County Museum. The world population of this endangered species is about 1846. Photograph by Don Doolittle.
North American Birds

is published by the American Birding Association.

The mission of the journal is to provide a complete overview of the changing panorama of our continent's birdlife, including outstanding records, range extensions and contractions, population dynamics, and changes in migration patterns or seasonal occurrence. We welcome submission of papers in these areas; papers and other communication should be sent to North American Birds, 9 Randolph Avenue, Cape Charles, VA 23310. For correspondence on photographic material, contact the Photo Editor at the email address below.

This new field guide covers all of the world's kites, vultures, harriers, hawks, buzzards, eagles, and falcons. Based on essential sections of the widely acclaimed handbook *Raptors of the World* by the same authors, but with updated text, maps, and plates, it shows every species in a selection of different plumages, with concise facing texts and distribution maps. It provides an easy-to-use and portable reference to one of the world's largest, most popular, and most challenging avian groups.

*Princeton Field Guides*

320 pages. 118 color plates. 320 maps. 6 x 9.

This is a quick-reference field guide to the sandpipers, plovers, stints, and other shorebirds found on these continents. The superbly detailed color plates show the birds at rest and in flight, and in every plumage variant likely to be encountered. Species are treated plumage by plumage alongside images of similar species they are otherwise likely to be confused with.

This guide provides fast, easy, and reliable field identification of this challenging group of birds.

240 pages. 77 color plates. 45 maps. 6 x 9.

**Fear not excellence.**

The NEW ULTRAVID excels in myriad ways. It's preemptively lightweight, pleasingly small and wildly rugged. All thanks to a 100% magnesium housing, and a Titanium center axis shaft. The thumb rest is an ergonomic masterpiece. As is the multifunction center drive; oversized and postured for intuitive manipulation. Inside, our High Lux System" prism coating collaborates with a new optical design, taking brightness, contrast and color to unprecedented levels. ULTRAVID. Bravely besting the field.

One of the rarest, most beautiful, and most mysterious birds in the world, the Ivory-billed Woodpecker has reappeared in the deep swamp forests of Arkansas. Feared extinct for decades, the species may also persist elsewhere within its former range, as significant remnants of the great southern forests are being protected and nurtured back to their former glory. The magnificent Ivory-billed Woodpecker speaks to us about our past, and about hopes for our future. This was a bird of the ancient forests. When we clear-cut the old growth southern forests, humans virtually eliminated the special haunts of this magnificent species. By securing and restoring large expanses of forest across the southern U.S. and allowing these places to grow old in their natural condition, we can hope that one day Ivory-billed Woodpeckers will again grace the treetops of our great southern forests.

Your purchase of this coffee directly aids the Big Woods Conservation Partnership in the securing and restoration of the Ivory-bill habitat.

Money raised from sales of the Ivory-bill blend is shared by the ABA and the BWCP. This shade grown, organic and fair trade coffee from Nicaragua, grown as the understory of the forest, also maintains winter feeding habitat for our neotropical migrants and provides the farmers of the cooperative with a living wage from growing coffee in a healthy and sustainable environment.
