Suggestions to authors

Manuscripts should be submitted in duplicate and should be typed double-spaced (including tables and tabulations of literature or of band numbers), on one side of 8½ × 11" bond paper. Margins should be one inch all around.

Tables and figures should be on separate sheets, one per page. Tables should be kept to a minimum. Drawings must be on durable paper, executed in india ink, with no shading. All lettering on figures should be executed with a lettering guide or — preferably — marked, on a separate page, for typesetting.

Photographs should be sharp and of good contrast. Glossy black and white, or color, prints are accepted; slides are not. More than 4 or 5 photos per article are not preferred.

When using information about birds banded by someone other than yourself, please acquaint yourself with the Policy on Release of Banding and/or Band Recovery Data, issued by the Bird Banding Laboratory.

Generally, papers longer than 15 pages, double-spaced, are considered too long. Style and form contained in the CBA Style Manual, Third Ed. (1972) is followed; vernacular bird names are taken from the A.O.U. Checklist, Fifth Ed. (1957) and the 32nd and 33rd Supplements thereto (1973, 1976).

Reprints are available at the author's expense; minimum order is 100, and a rate schedule can be obtained from the publisher, Eldon Publishing, P.O. Box 446, Cave Creek, AZ 85331. Extra copies of issues can be purchased at \$2.00 each from the treasurer of your association.

Table of Contents

Articles

- 2** Capturing birds with mist nets: A review
Brian E. Keyes and Christian E. Grue
- 15** On the use of electrical conduit for mist net poles
Jerome A. Jackson and Bette J. Schardien
- 16** Another mist net pole variation
Carl J. Trichka and Dennis Varza
- 18** Poor-wills nesting in southwestern Oregon: A sequel
Otis D. Swisher
- 20** Some factors influencing feeder selection by Black-capped Chickadees and Red-breasted Nuthatches
Robert P. Yunick
- 24** A case for storage and transportation of mist net poles
James W. Parker
- 25** A fecundity record in the Tree Swallow
Peter Dring
