

# Rare Birds of California now available!

Price \$54.00 for WFO members, \$59.99 for nonmembers

HAMILTON  
ERICKSON  
RARE BIRDS OF CALIFORNIA

Scientific, artistic, and inspirational, this 600-page book synthesizes the work of the California Bird Records Committee from 1970 through 2006, putting every vagrant to California in its geographical and historical context. It is generously illustrated with color and black and white photography, including the best photographs ever taken in California of rare birds. Maps and charts depict spatial and temporal distributions, and the interpretive text adds value far beyond the lists of records. *Rare Birds of California* can be sitting in your library within a few short days! A discount of 10% is available on every copy sold to a WFO member or for every order of ten books or more. Shipping and handling are an additional \$6.00 per copy. California sales tax is 8.25% per copy. Including tax, shipping, and handling, the total amount per copy is \$64.46 for members or \$70.95 for nonmembers.

Order *Rare Birds of California* through Allen Press  
by calling 1-800-627-0326,  
or order online at <https://bookstore.allenmm.com>

Please direct any questions to WFO vice-president  
Catherine Waters at 562-869-6718.

Western Field Ornithologists announces the first volume of its new monograph series, *Studies of Western Birds*, with the publication of *California Bird Species of Special Concern: A ranked assessment of species, subspecies, and distinct populations of birds of immediate conservation concern in California*, edited by W. David Shuford and Thomas Gardali. This volume, co-published with California Department of Fish and Game and prepared with a host of collaborators, will be of value to every field ornithologist, conservationist, wildlife biologist, biological consulting company, and planner in California.

This 450-page softcover volume is a must-have reference on the status of California's declining and vulnerable bird species. An overview section describes the process of identifying species at risk and ranking their conservation priority, distinguishes the habitats and geographic areas of the state with high numbers of birds at risk, and pinpoints the most pressing threats they face. The heart of the book is the section with species accounts for 63 species, written by 48 experts, which include maps of current and historic ranges and describe birds' status, population trends, ecological requirements, threats, and management, research, and monitoring needs. Illustrations of birds in natural settings include a stunning color cover by Keith Hansen and imaginative black-and-white vignettes by Andy Birch and Tim Manolis interspersed throughout the text.

Major support for the production and printing of this book has been generously provided by California Department of Fish and Game, Audubon California, BonTerra Consulting, EDAW, H. T. Harvey & Associates, Jones & Stokes, LSA Associates, The Nature Conservancy, PRBO Conservation Science, SWCA Environmental Consultants, and Western Field Ornithologists. Funding and donations from these and other sources have substantially lowered the cost of the book.
