

WESTERN BIRDS

Vol. 39, No. 3, 2008

Volume 39, Number 3, 2008

The 32 nd Report of the California Bird Records Committee: 2006 Records <i>Matthew T. Heindel and Kimball L. Garrett</i>	121
Shorebird Use of Muted Tidal Wetlands in a California Estuary <i>Sarah Connors</i>	153
NOTES	
Purple Martin Distribution and Nesting Habitat at Shasta Lake, California <i>Len Lindstrand III</i>	166
Sap Feeding on Birch Trees by American Three-toed Woodpeckers <i>Theodore N. Bailey</i>	171
First Records of the Brown Creeper Breeding along the Middle Rio Grande in Central New Mexico <i>Jean-Luc E. Cartron, David L. Hawksworth, and Deborah M. Finch</i>	176
Book Reviews <i>Jan Hodder, George A. Jobanek, and Ted Floyd</i>	179
Featured Photo: First Documentation of a Eurasian Kestrel in California <i>Angus C. Hull, Michael G. Armer, Bethany J. Sturgeon, and Allen M. Fish</i>	184

Front cover photo by © Bob Steele of Inyokern, California: Arctic Warbler (*Phylloscopus borealis*), Galileo Hill, Kern County, California, 7 September 2007, one of three Arctic Warblers found and photographed in California 6–13 September 2007. Away from Alaska, this species had been recorded in North America only seven times previously, twice in northwestern Canada, four times in California, and once in Baja California.

Back cover “Featured Photos” by © Michael Armer of Mountain View, California: Eurasian Kestrel (*Falco tinnunculus*), juvenile female, banded at the Marin Headlands, Marin County, California, 23 October 2007. Southernmost record of this species for western North America, following 11 for Alaska, one for British Columbia, and one for Washington.

Western Birds solicits papers that are both useful to and understandable by amateur field ornithologists and also contribute significantly to scientific literature. The journal welcomes contributions from both professionals and amateurs. Appropriate topics include distribution, migration, status, identification, geographic variation, conservation, behavior, ecology, population dynamics, habitat requirements, the effects of pollution, and techniques for censusing, sound recording, and photographing birds in the field. Papers of general interest will be considered regardless of their geographic origin, but particularly desired are reports of studies done in or bearing on the Rocky Mountain and Pacific states and provinces, including Alaska and Hawaii, western Texas, northwestern Mexico, and the northeastern Pacific Ocean.

Send manuscripts to Kathy Molina, Section of Ornithology, Natural History Museum of Los Angeles County, 900 Exposition Blvd., Los Angeles, CA 90007. For matters of style consult the Suggestions to Contributors to *Western Birds* (at www.wfo-cbrc.org/journal.html).

Good photographs of rare and unusual birds, unaccompanied by an article but with caption including species, date, locality and other pertinent information, are wanted for publication in *Western Birds*. Submit photos and captions to Photo Editor. Also needed are black and white pen and ink drawings of western birds. Please send these, with captions, to Graphics Manager.
