

A little persistent and careful work must certainly reveal this beautiful warbler to every member east of the plains. Look in the tree tops early in May.

★ *Helminthophila leucobronchialis* (Brewst.)

Portland, Conn., S. R., rare.

Helminthophila lawrencei (Herrick.)

Portland, Conn., very rare.

These two species belong in the "Hypothetical List," supposed to be hybrids between *H. pinus* and *H. chrysoptera*. The number of specimens grading each way, taken in Connecticut, seem to furnish material for doubting their authenticity.

Helminthophila ruficapilla (Wils.) NASHVILLE WARBLER.

	T. V.	S. R.	GENERAL NOTES.
Coffeyville, Kan....	common		
Jackson Co., Mo....	common		
Salem, Iowa.....	common		5-10-'94

Miller's Cor's, N. Y.	rare		5-7-'93
Oswego Co., N. Y..	abundant		
Portland, Conn....		common	
Wethersfield, Conn.		common	from May 26 to Sept. 21
Bangor, Me.....		common	
Phillips, Me.....		common	one nest

It is almost a wonder that any one can overlook this little fellow. His concealed chestnut crown cannot be seen any more readily than the ruby crown of the Ruby-crowned Kinglet, whom he somewhat resembles in his actions and manner of feeding. Look for them in the middle and lower stories of the woodland.
