

This and the preceding species are of similar habits, and both are early spring arrivals, usually appearing in April.

Dendroica discolor (Vieill.) PRAIRIE WARBLER.

Lorain Co., O., one taken May 7. 1892.

Perrineville, N. J., common S. R.

Portland, Conn., not common S. R.

We should keep a sharp lookout for this species. It seems to be very little known.

Sciurus aurocapillus (Linn.) OVEN-BIRD.

	S. R.	1893.	GENERAL NOTES.
Garden City, Kan.			not common T. V.
Jackson Co., Mo.	common		
Salem, Iowa.	common	5-5	4-29-'94
Grinnell, Iowa.	common		
Winnebago Co., Ill.	common	5-4	L. 9-24-'93
Meridian, Wis.	common		
Delavan, Wis.	common		
St. Paul, Minn.	common		
Hamilton Co., O.	common		
Lorain Co., O.	abundant	5-13	5-2-'94
Green Co., Pa.	common		
Berwyn, Pa.	abundant	4-13	L. 9-21-'93
Perrineville, N. J.	abundant	5-1	L. 10-1-'93
Miller's Cor's, N. Y.	common

Oswego City, N. Y.	abundant		
Portland, Conn.	common		
Wethersfield, Conn.	common	5-26	
Phillips, Me.	common		
Toronto, Can.	common		

Another good subject for special study. One that always heralds his arrivals in a well known key. We all must find him if we go into the woods.
