

NORTHERN SHRIKE.—Not recorded in fall, and not seen until late in March. During the winter of 1894-5, several individuals remained in and around Oberlin.

The mild character of the past winter would seem to invite the birds which usually do not migrate southward, to remain. Food has been as plentiful as usual, yet a large number of our winter birds have not been present.—LYNDS JONES, *Oberlin, Ohio.*

CORRECTIONS.—BULLETIN No. 6 contained the statement that "Dickcissel is a regular summer resident in New England as far north as Massachusetts, being rare further north, but locally distributed." This is a mistake of the compiler of the notes and not of Mr. Buck. The bird was formerly found in that region, but is not now considered a bird of New England at all.

Mr. Buck informs me that he has found Grasshopper Sparrow almost in the suburbs of New Haven, and also on the north Massachusetts state line; and that therefore the word "very" as applied to the rarity of the species at New Haven, should be stricken out, and the bird's range extended into southern New Hampshire and Vermont. It is everywhere locally distributed because suitable places for nesting are not numerous.

The name of Mr. Chester Barlow, Box 135, Santa Clara, California, was inadvertently omitted from the list of Active members in BULLETIN 6. Mr. Barlow was elected an Active member in November, 1895. Also the name of Mrs. Agnes Chase, Chicago, Ill., who was elected last April.

Mr. Geo. D. Peck has changed his address to Salem, Oregon.

In BULLETIN No. 6, Mrs. T. B. Tullock should read Mr. T. B. Tullock, Rockford, Ill.

PUBLICATIONS RECEIVED.

Eggs of Native Pennsylvania Birds. A World's Fair Collection. By J. Warren Jacobs.

This is the second of the pamphlets relating to Pennsylvania birds, published by our fellow member, Mr. Jacobs. It is a neat ten page pamphlet with colored covers, containing an excellent half-tone photo of the author, as frontispiece, besides three half-tone plates of representative sets of eggs mounted for exhibition, and one plate of the nests and eggs of Ruby-throated Hummingbirds similarly mounted.

In his introduction, the author states the object of the pamphlet to be
