WADY PETRA, ILL.

---

February 6, 1898, 7:30 A. M. The one old Flicker still here at the depot. Saw a flock of 30 Prairie Hens fly by over a corn-field. These are the only ones seen for three or four months.

There is a foot of snow on the ground which has been here for fully two weeks. I walked along the creek thru half a mile of thicket and a quarter mile of open woods, from 8:30 to 9:30 A. M. 30° to 32°. Wind S. E.

In the thicket a company of 7 Chickadees and 11 Tree Sparrows, 8 Prairie Horned Larks flew over. In the woods I found a noisy company of 13 Chickadees, 3 White-breasted Nuthatches, 4 Downy Woodpecks, 1 Hairy Woodpecker and 1 Brown Creeper, with 7 Crows at a little distance. Total, 86 birds including 10 species.

February 13, 1898. 46°. Partly cloudy. Disagreeable south-west wind. 2 to 3:25 P. M. Locality as before. 3 Chickadees, 3 Downy Woodpeckers, 7 Crows, 4 Prairie Horned Larks, 8 Cedarbirds—the first *flock* I ever saw. I also noted 30 or 35 small birds fly over, which, from their flight and size, I think were Cedarbirds.

V. H. CHASE.

BIRD HORIZONS.

---

LORAIN COUNTY, OHIO.

---

The pleasurable work of taking bird censo-horizons and bird horizons has gone steadily on since the last report. The most notable one since those reported in the last Bulletin was that of March 12. The one of February 12 has been dwelt upon not a little on a preceding page. For five days previous to March 12, spring-like weather had prevailed, and on the three days immediately preceding, the temperatures had reached 60° at noon, not falling below 40° during the night. Light southerly winds and clear weather was the rule, but on the 11th rain fell in warm showers. The 12th opened cloudy with a light south wind and a temperature of 51° (which fell to 40° before night).
