SUGGESTIONS TO AUTHORS

Manuscripts intended for publication in *The Wilson Bulletin* should be neatly typewritten, double-spaced, and on one side only of good quality white paper. Tables should be typed on separate sheets. Before preparing these, carefully consider whether the material is best presented in tabular form. Where the value of quantitative data can be enhanced by use of appropriate statistical methods, these should be used. Follow the A. O. U. Check-List (Fifth Edition, 1957) insofar as scientific names of United States and Canadian birds are concerned unless a satisfactory explanation is offered for doing otherwise. Use species names (binomials) unless specimens have actually been handled and subspecifically identified. Summaries of major papers should be brief but quotable. Where fewer than five papers are cited, the citations may be included in the text. All citations in "General Notes" should be included in the text. Follow carefully the style used in this issue in listing the literature cited. Photographs for illustrations should be sharp, have good contrast, and be on glossy paper. Submit prints unmounted and attach to each a brief but adequate legend. Do not write heavily on the backs of photographs. Diagrams and line drawings should be in black ink and their lettering large enough to permit reduction. Authors are requested to return proof promptly. Extensive alterations in copy after the type has been set must be charged to the author.

A WORD TO MEMBERS

*The Wilson Bulletin* is not as large as we want it to be. It will become larger as funds for publication increase. The Society loses money, and the size of the *Bulletin* is cut down accordingly, each time a member fails to pay dues and is put on the "suspended list." Postage is used in notifying the printer of this suspension. More postage is used in notifying the member and urging him to pay his dues. When he does finally pay he must be reinstated in the mailing list and there is a printer's charge for this service. The *Bulletin* will become larger if members will make a point of paying their dues promptly.

NOTICE OF CHANGE OF ADDRESS

If your address changes, notify the Society immediately. Send your complete new address to the Treasurer, Merrill Wood, Dept. of Zoology and Entomology, Frear Laboratory, Pennsylvania State University, University Park, Pennsylvania. He will notify the publisher.

## LOUIS AGASSIZ FUERTES RESEARCH GRANT

This grant, established in 1947, is devoted to the encouragement and stimulation of young ornithologists. One particular desire is the development of research interests among amateur ornithologists. Any kind of ornithological research may be aided. Recipients of grants need not be associated with academic organizations. Each proposal is considered primarily on the basis of possible contributions to ornithological knowledge.

An anonymous donor gave \$500 to found the fund; later donors have provided some \$600. The Council of the Wilson Ornithological Society has added funds as necessary to provide at least one \$100 grant annually.

Although grantees are not required to publish their studies in *The Wilson Bulletin*, it is hoped that they will submit their manuscripts to the Editor of the *Bulletin* for consideration.

Since its inception the Fuertes Research Grant has been awarded to 14 persons, many of whom have continued their research work. The recipients are listed below.

- 1948—Leonard R. Mewaldt, Life history of Clark's Nutcracker.  
1949—Stephen W. Eaton, A comparative study of the genus *Seiurus*.  
1950—Henry E. Childs, Population dynamics and life history of the Brown Towhee.  
    Byron E. Harrell, Ecology of the Rancho del Cielo, Tamaulipas, Mexico.  
    Arnold J. Petersen, Reproductive cycle in the Bank Swallow.  
    Harrison B. Tordoff, Comparative osteology of the subfamilies of the Fringillidae.  
1951—Howard L. Cogswell, Territory size and its relation to vegetation, structure and density among birds of the chaparral.  
1952—Robert W. Nero, Territorial and sexual behavior in the Red-wing.  
1953—No award.  
1954—William C. Dilger, The isolating mechanisms and relationships of the thrush genus *Hylocichla*.  
1955—Robert G. Wolk, Analysis of reproductive behavior in the Black Skimmer.  
1956—John B. Millar, An investigation of possible factors involved in the initiation of migration.  
    Lester L. Short, Jr., Hybridization and isolating mechanisms in North American flickers.  
1957—Millicent (Mrs. Robert L.) Ficken, Comparative study of the behavior of the Canada Warbler and the Redstart.  
1958—Harold D. Mahan, Studies of growth and temperature regulation in the Red-wing.  
1959—No award.

Application forms may be obtained from Harvey I. Fisher, Southern Illinois University, Carbondale, Illinois. Completed applications must be received by March 1, 1960.
