## PUBLICATION NOTES AND NOTICES

Waterfowl Migration Corridors East of the Rocky Mountains in the United States. By Frank C. Bellrose. Biological Notes No. 61, Illinois Natural History Survey, Urbana, Illinois, 1968: 23 pp. 6 maps. (Single copies available at no charge from the publisher.)

From an analysis of band recoveries; visual sightings of ground observers and aircraft observers; radar surveillance; formal waterfowl censuses; and the annual winter waterfowl inventory the author has arrived at updated versions of the Lincoln waterfowl flyway maps published years ago. Besides the informative text, excellent maps showing both the directions and intensities of the various flights are given for the fall migrations of the dabbling ducks, the diving ducks, and Canada Geese, and for both spring and fall migrations of Blue and Snow Geese.—G.A.H.

SYMPOSIUM: Introduction of Exotic Animals: Ecological and Socioeconomic Considerations. Sponsored by the Texas Chapter of The Wildlife Society at the 18th Annual Meeting of the American Institute of Biological Sciences. Published by the Caesar Kleberg Research Program in Wildlife Ecology, College of Agriculture, Texas A & M University, College Station. 1968. 25 pp. No price given.

A series of seven papers on this sometimes controversial subject, including two on quarantine and disease problems. All authors were more or less on the side favorable to introductions and the symposium would seem to have been rather one-sided.—G.A.H.
