

SUGGESTIONS TO AUTHORS

Manuscripts.—Manuscripts intended for publication in *The Wilson Bulletin* should be neatly typewritten, double-spaced (*especially tables and "literature cited"*), with at least 3 cm margins all around, and on one side of good quality paper. Do not use erasable typing paper. All pages should be numbered. Two copies should be submitted. Xerographic copies are acceptable if they are clearly readable and on good quality paper. Copies on heavy, slick paper, as used in some copy machines, are not acceptable.

Tables.—Tables are expensive to print and authors should consider carefully whether or not a table is really necessary or adds to the paper. Tables should be designed so as to be narrow and deep rather than wide and shallow. Double space all entries in tables, including titles. Do not use vertical rules. Tables should be typed on separate sheets and placed at the end of the MS.

Figures.—All illustrations should be prepared (particularly insofar as the lettering goes) so as to be readable when reduced in size. The final size will usually be 11.4 cm wide. Illustrations larger than 22 × 28 cm will not be accepted, and these should be reduced photographically before submitting. Legends for all figures should be typed on a separate sheet. Photographs should be clear, of good contrast, and on glossy paper. Drawings should be in India ink on good drawing board, drafting paper, or blue-lined graph paper. All lettering on drawings should be done with a lettering instrument or the equivalent. Designate the top of each illustration and identify (on the back in soft pencil) with author's name, and figure number. Submit 2 duplicates or readable xerographic copies of each figure so that originals don't have to be sent to the reviewers.

Style and Format.—For general matters of style in preparing a scientific article authors should consult the "CBE Style Manual," 3rd Ed., Am. Inst. Biol. Sci., Washington, D.C. 1972. All MSS should be submitted in the general format used in recent issues of the *Bulletin*. Avoid footnotes, and avoid more than 2 levels of subject subheadings. Except in rare circumstances lead papers should be followed by a summary, not to exceed 10% of the length of the paper. Summaries should be informative when standing by themselves. Most units should be given in the metric system, and compound units should be given in one-line form (i.e. cm-sec⁻²). The continental system of dating (21 March 1972) and the 24 hour clock (09:00 and 22:00) should be used.

References.—In long MSS, if more than 5 papers are cited, these should be included in a terminal "Literature Cited" section. Include only references actually cited, and include only material available in the open literature ("In-house" technical reports and the like should not be cited). The style of citation can be obtained from recent issues of the *Bulletin*. For abbreviations of periodical names use the list given in the most recent issue of "BIOSIS," Bioscience Information Service, Philadelphia, Pa. If in doubt, do not abbreviate serial names. All references in "General Notes" and in long papers containing fewer than 5 references should be cited internally e.g. (James, *Wilson Bull.* 83:215–236, 1971) or James (*Wilson Bull.* 83:215–236, 1971).

Nomenclature.—Common names and technical names of birds should be those given in the 1957 A.O.U. Check-list (and such supplements as may appear) unless justification is given for departing from this list. For bird species in Middle and South America the *Bulletin* uses the common names appearing in Eisenmann, "Species of Middle American Birds," 1955 and Meyer de Schauensee "The Species of Birds of South America," 1966. Common names of birds should be capitalized.

This issue of *The Wilson Bulletin* was published on 26 March 1975.
