Black and Turkey Vultures. As part of a study of their ecology, Black and Turkey vultures are being marked with white plastic wing tags. These tags are fastened around the humerus and are visible from above or below. Each tag has a combination of a letter and a 2-digit number painted on it. All birds are being marked in east Mississippi. If marked vultures are observed, please send details of the observation to: Jerome A. Jackson, Department of Zoology, Mississippi State University, Mississippi State, MS 39762.
